EDUCATION

Bachelor of Computer Engineering, Vishwakarma Institute of Technology — Sep 2025 - Expected July 2029
Grade: *First Class with Distinction* — *Pune, India*

LEADERSHIP ACTIVITIES

AWS Student Builder Group, VIT Pune - Technical Lead — Oct 2026 - Present
- Led client projects for startups and industry partners, including the website for Daily Bread, a Mumbai-based wellness-beverage startup; gathered requirements with client stakeholders and deployed it to production on the client's own domain.
- Oversaw project delivery and development practices for a 128-member club, running workshops on modern tech.

Google Developer Group, VIT Pune - Web Development Member — Nov 2025 - Present
- Led a team of 25 developers to design and deploy 2 full-stack platforms: a campus Placement Portal and Parkomate, a production-line application for device testing, program flashing, and streamlined factory-floor workflows.
- Ran code reviews and maintained project repositories, ensuring code quality, consistency, and maintainability. Automated testing and deployment with GitHub Actions.

TECHNICAL SKILLS & INTERESTS

Programming Languages:	C++, Python, C, JavaScript, TypeScript, SQL
Core CS:	Data Structures & Algorithms, OOP, DBMS
Web & Backend:	React.js, Next.js, TypeScript, TailwindCSS, Vite, FastAPI, Flask, Node.js, REST APIs, WebSockets, SSE, JWT/RBAC, Firebase Auth, Supabase
Databases:	MySQL, PostgreSQL, Firebase, MongoDB
DevOps & Testing:	Docker, Docker Compose, Git, GitHub Actions (CI/CD), pytest
Framework/Libraries:	LightGBM, NetworkX

PROJECTS

SUTRA - Financial Crime & Insider Risk Intelligence Platform - Link
Python, FastAPI, Next.js, PostgreSQL, LightGBM, NetworkX, Docker
- Engineered a fraud-detection pipeline linking insider access privileges to suspicious payments across 400K+ transactions and 150K access events, using 10 rule-based checks, 5 graph detectors, and 3 ML models.
- Built an explainability layer that argues for and against each alert and simulates which controls would stop it; achieved 1.00 precision, 0.97 recall, and zero false alerts on legitimate look-alikes (synthetic test set).

JanMaang - AI-Powered Civic Problem-Solving Platform - Link
Next.js, TypeScript, Flutter, FastAPI, PostgreSQL, Redis, LLMs
- Constructed a civic-tech platform connecting citizens, government bodies, universities, NGOs, and industry partners to transform community challenges into actionable projects.
- Implemented a multilingual, voice-enabled, offline-first mobile app with geotagged submissions and before-and-after evidence verification to improve civic accessibility and accountability.
- Developed a multi-agent collaboration system where AI agents debate student-proposed solutions and evaluate their legality, authenticity, and practical feasibility before recommending viable approaches.

ACHIEVEMENTS

Harvard International Delegate 2026: selected as an International Delegate for the HPAIR Asia Conference 2026, "Rising with Resolve," from 50,000+ applications across 70+ countries.
Honeywell Leadership Challenge Academy 2025: selected among 4 students from India to join 140+ International Delegates from 23+ countries at NASA Marshall's official center, U.S. Space & Rocket Center, United States.
HackAgentAIx – Top 14 : advanced from 2,000+ teams worldwide to the Top 14 and finals in a multi-round international hackathon hosted by the University of Essex, UK.
